Five Reasons Why *GemePrice™* Improves Your Gem Business Transactions

1. **You have unlimited access to the most comprehensive online pricing system for diamonds, fancy colored diamonds, gemstones and jewelry in the market** for your business needs.

2. **You can rely on the prices**, as they are **generated, updated and authenticated** every month.

3. **No more "guesstimating" a gem's grade** - with the integrated GemeSquare™, you have a built-in Color Grading set for colored diamonds and gemstones.

4. **Interactively** understand how **each gem parameter affects its price** and choose to view it in your preferred Language, Currency or Markup.

5. **You can access it anytime, anywhere**, on your mobile devices, including, laptops, tablets and smartphones.

About Gemewizard

Gemewizard® is a pioneer in the development of digital color based systems, which provide solutions for professionals involved in the fancy colored diamonds, colored gemstones and jewelry industries, enabling the analysis, description, communication, pricing and trading of color in gems. The suite of products developed by Gemewizard® is based on the company's groundbreaking color communication technology called GemeSquare™, which has been endorsed by GIA® and Gem - A for education.

Pricing System

GemePrice5.0™
Grading Your Color, Pricing Your Gems

The **GemePrice™** is an online pricing system and pricelist allocating prices to diamonds, fancy colored diamonds and gemstones according to the Color Codes generated by Gemewizard™.
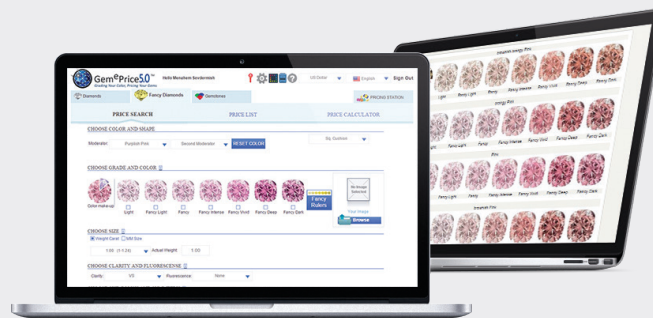

GemePrice™ enables a user to find the price of a specific gem either by defining the gem's specifications or by browsing through the pricelist's various grades and sizes.

GemePrice™ database contains grades, qualities, commercial names and prices of nearly 2000 fancy colored diamonds' color combinations and grades, and over 60 types of the most traded gemstones with a visual display of over 15 shapes.

The user can easily find the price according to any or all possible gems' parameters, including: gem type, shape, particular color, color grade, pattern, transparency, clarity grade, cut grade and treatments.
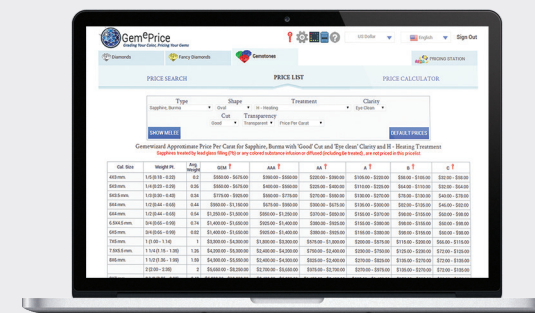

In addition, the Jeweler's Station mode enables the user to estimate the price of a piece of jewelry using current market prices of metal and gems.

Prices quoted by **GemePrice™** are generated and authenticated by:

- ✔ Analysis of more than 250,000 gems being offered for sale at any particular time on the Internet;

- ✔ Prices allocated by a panel of industry-renowned experts;

- ✔ Real-time commercial data.
  The prices are updated once a month after thorough statistical analysis by experts using advanced algorithms to ensure data integrity.

GemePrice™ is offered as a web-based software and available for desktop and laptop computers, smartphones and tablets.

GemePrice™ is fully integrated with GemeSquare™, the world-renowned color communication system endorsed by GIA® education, and is offered with a multi-lingual and multi-currency interface for users worldwide.

GemePrice™ subscriptions are restricted to professional members in the gem industry. GemePrice™ is not available to the general public.
